1           38. A method for enabling a user to perform a decorating session for a space, comprising the  
2 steps of:  
3           (a) receiving, at a web server, a request from a remote client computer for access to a  
4 decorating web site supported by the web server; and  
5           (b) executing, in response to the request, software to enable the user to perform the  
decorating session for the space, wherein, during the decorating session, the user is able to:  
6           (i) select one or more structural objects represented in a display corresponding to  
the space; and  
7           (ii) select a decorative material from a plurality of available decorative materials to  
be applied to each selected structural object independent of the decorative materials selected for any  
8 other structural object, wherein the software controls the appearance of the decorative material based on  
9 one or more characteristics of the structural object in the space.
